

Vertex Standard Exhibits at IWCE showcasing eVerge™ DMR two-way radios to technology buyers.

April 9, 2013 – Vertex Standard showcased its new eVerge DMR two-way radio portfolio at IWCE in Las Vegas, Nevada, USA from March 13 – 14, 2013. The International Wireless Communications Expo hosts over 7,500 technology buyers from a diverse group of communications dealers, government, public safety, transportation, security, utilities and other markets attending to see the latest in effective communications systems.

Vertex Standard is one of the IWCE premier sponsors and a long-time exhibitor at this annual event. Read the pre-show coverage by Urgent Communications: [Vertex Standard to introduce affordable digital radios](#). Hundreds of Vertex Standard authorized dealers and distributors also attended Vertex Standard's annual business meeting held prior to IWCE to learn more about the products, programs and resources available to sell eVerge DMR radios in North America.

The eVerge digital radio display was Vertex Standard's main focus to introduce customers to a new choice in digital land mobile radios to evolve to better communications designed for businesses on a budget. eVerge digital radios help commercial professionals do digital right the first time, getting the right radio with the right protocol and right performance – all at a better cost to connect without compromise. Attendees were introduced to the new EVX-530 Series digital portable radios (EVX-531 non-display; EVX-534 4-key display; EVX-539 full-key display), EVX-5300/5400 digital mobile radios and EVX-R70 digital mobile repeater designed to help customers communicate better with improved call quality, better coverage and better privacy than traditional analog two-way radios. [Watch the video](#) featuring Rick Wolochatiuk, Vertex Standard Global Vice President of Distribution at IWCE introducing the new eVerge digital radios.

Visit Vertex Standard's new eVerge digital website for complete product specifications and digital resources about evolving to better communications: www.everge.vertexstandard.com.
